

**Fulfilling our mission of spreading Islamic culture among our students, the school celebrated 3 different events during the first semester:**

1. The first 10 days of ZulHijja and Hajj (pilgrimage)
2. The Hijra of the Prophet Mohammed (SAW) from Mecca to Madinah
3. The Mawled (birthday) of Prophet Mohamed (SAW)

Celebrations included various cultural and fun activities for the younger and older students. The school broadcasting programme was dedicated to these events. Many competitions took place to enrich the students knowledge about the various details and morals of the 3 events. The students also contributed with their own art, poetry and plays in the parties which took place.

A miniature model of the Hajj was set up where younger students enjoyed practicing the rituals in a fun and joyful environment.

The school also hosted the well known Islamic figure Mr. Ahmed Eldomy, who delivered a lecture to the elder students about the morals and virtues of the Hijrah.

## Egypt Day

KG Azhar students have celebrated Egypt Day.

They had lots of fun rotating through different activities.

The Activities presented Egypt's Culture and ways of helping in the community such as painting and planting.

# Math is Fun

That was the theme of Maths Day.

Kids played ,learned and had a lot of fun on Math Day.

The day started with a market ,where they sold their goods and bought from their friends , some interesting stuff.

Kids used printed money ,they had to calculate the total cost and find the remainder. They had registered everything in a receipt.

After the break time, kids had really a lot of fun playing Math outdoor games. Almost every topic has been covered with games that reinforced the learning process.

Ali, One of the students said: Miss, I am so happy ,I had a lot of fun.

## Maths and Traffic Day For KG

During that day Maths activities were integrated with Means of Transportation, Street Signs and Manners activities.

They had an addition activity with Bike Race.

Ladder and Mean of Transportation counting activity.

They did a lovely Mean of Transportation mobile using different shapes.

They also had a colour code Activity.

# Science Is Fun

Our students enjoy learning science in new strategy. They can express their lessons in art, technology, playing, crafts..etc.

## Chemistry is

9	92	7
F	U	N
Fluorine	Uranium	Nitrogen
18.998473	238.02891	14.00643

Prep.3 Cell division with hand-crafts

Prep.1 illustrating their lessons using Power Point and Prezi

Secondary 2 drawing periodic table on their class ground.

Primary 4 presenting science lesson in a sketch

Pr.4 Creating their own solar system by themselves

We build scientific confidence that lasts a lifetime!

## Young Inventor

Science had been my interest since childhood, so when the Head of the science department, told me about the Science Fair, I couldn't hold my breath. Once I entered through the Fair's gate, I felt like in a dream. I moved around with my camera and my little notebook taking notes and pictures, so I could tell everybody about it. Science projects were lining the walls of the hall, and students stood behind their tables demonstrating the idea of their projects. Physics, Chemistry and Biology were all involved in the projects. One student, for instance, made an electric vacuum cleaner! Another extracted the DNA from fruits, and some even investigated Osmosis in Potatoes. When I went home that day, i spent almost 2 hours telling my parents how my visit to the Science Fair was. Just one week later, we studied the Hydraulic Press at school, and I thought "Why not try it? It's gonna be something great" I went home, surfed the internet, and decided I would make a Hydraulic Drawbridge! I shopped for everything I needed for my project and started processing it. My brother, only 10, was amused by the idea and helped me throughout the day. When I put the last craft stick and I saw the drawbridge going up and down, it was definitely the feeling of mg life! So yeah, the Science Fair has helped me discover the part for creativity in my mysterious brain.

Shaimaa and Abd Rahman samir illustrating the project.

## احتفال يوم اللغة العربية في مدارس المهدي

في اليوم الثامن عشر من شهر ديسمبر احتفلت المدارس باليوم العالمي للغة العربية، فقد قدم طلاب القسم الأزهرى (الصفوف من الأول للرايع ) فقرات رائعة ما بين القصائد والمشاهد التمثيلية والأناشيد والعروض البسيطة.

وقد استمتع الجميع بهذا اليوم الجميل ، وأثنوا على أداء الطلاب الرائع.

اللغة العربية

## قسم التربية الدينية – أزرع الابتدائي الصغير

ما ظنكم ؟ أهى حصة زراعة ؟ علوم ؟ قراءة ؟ رياضيات ؟ تعبير ؟ تربية فنية ؟ أم كورال ؟

إنها حصة التربية الدينية فى ثوبها الحديث ، تحرض معلمات القسم على أن تكون دروسهم ممتدة الأثر فى نفوس الأطفال وممارساتهم الحياتية ...

ومن أجل ذلك يتنوع الأداء ما بين أنشطة صفية داخلية وخارجية... فردية وجماعية... ثابتة ودوارة ... فى الفصل وغرف الأنشطة والأناشيد والرسم والحديقة ...

كما أن توفر الأدوات التكنولوجية فى جميع الفصول كان له عظيم الأثر فى تطوير الأنشطة الصفية وتيسير تحقق استراتيجيات التعلم الحديثة ، والارتفاع بمستوى الأداء...

ويتجلى الأثر فى مراسلات أولياء الأمور التى تشيد بسلوك الأبناء .

كل الشكر لإدارة المدرسة ،

المعلمات وأولياء الأمور.
